

Front-End Engineer

Inhabited by inventive, motivated and talented people, our Development team enjoys building up new applications, key features and products that make a difference in the online experience.

As a junior front-end engineer, you will be called on to design and implement interactive features, to create robust high-volume production applications and to develop prototypes.

Main Tasks and Responsibilities:

- From the start you will be involved in decision making of the projects assigned to the team
- Armed with deep knowledge of Fnbox products, online trends and the business model details, you will work in a team on large scale projects, ensuring robust & lasting solutions are implemented
- Be aware of mobile platform with the ability to build solutions that take advantage of the latest features while performing on the latest devices
- Learn and leverage JavaScript libraries in solutions implemented
- Use web standards to build solutions that require semantic markup and CSS
- Design, implement and launch innovative and highly-visible, user-facing features that people will blog and Twitter about
- Aim to work in a fast-paced, constantly evolving team environment

Requirements:

- Informatics engineer students or recently graduated with strong academic records. Software development experience with front end web development (Javascript, AJAX, JQuery)
- Awareness of the interplay between JavaScript and HTML & CSS, and capability to dynamically create, modify, and style elements on a page with ease
- Initiated JavaScript developer who understands basic DOM manipulation
- Programming experience in Front-End is a plus
- Knowledge about HTML5 and CSS3 is highly valued

About Fnbox Ventures Inc.

Founded in 2002, Fnbox is a leading Latin-American holding enterprise focused on the creation and development of global and scalable Internet companies which offer a variety of inventive solutions for our customer's everyday problems. Supported by our American investors and rewarded as a Great Place to Work in 2008, 2009 and 2010, we continually work to build a world class company to become a powerhouse of technology and innovation in our region.
