

Tech Lead PHP Engineer

Our Development team works to design, develop, and roll out key features and products in all Fnbox.com properties. Reporting directly to Management, as a Senior PHP engineer you will be responsible of writing server-side code for web-based applications, for internal and external use.

Armed with deep knowledge on how to create robust high-volume production applications, you will be called on to develop prototypes quickly. The work is challenging, creative, fast paced and intellectually stimulating. You will be generating critical impact in this young entrepreneurial Argentinian company that works within a high tech complexity.

Main Tasks and Responsibilities:

- Design and develop large scale web applications, ensuring robust & lasting solutions are implemented
- Implement and launch highly-visible, user-facing features
- Organize working teams for the various business units at Fnbox; manage different projects at a time while paying strict attention to each one of them
- Interact with Management to gather requirements, and assign tasks for the teams, monitoring that the project objectives are accomplished

Requirements:

- Degree of Informatics Engineer; solid foundation in computer science and/or equivalent work experience, with strong competencies in data structures, algorithms, and software design
- At least 3 years of programming experience in PHP (strong OO skills preferred)
- Experience as architect or technical lead on large projects is a strong plus (no JR)
- Coding skills Javascript/AJAX, database design and SQL, and/or knowledge of TCP/IP and network programming are a plus
- Ability to work in a fast-paced, constantly evolving team environment
- Work in an autonomous way and focus on delivering solutions on time

About Fnbox Ventures Inc.

Founded in 2002 Fnbox is a leading Latin-American holding enterprise focused on the creation and development of global and scalable Internet companies which offer a variety of inventive solutions for our customer's everyday problems. Supported by our American investors and rewarded as a Great Place to Work in 2008, 2009 and 2010, we continually work to build a world class company to become a powerhouse of technology and innovation in our region.
